Did you know that Microsoft is ending support for the Windows 10 operating system starting this October? The CJIS Security Policy Manual (CJISSECPOL) mandates systems that handle CJI to only use software that is currently supported by the manufacturer with regular security patches. That means we all have until October to upgrade and/or replace all our Flex client computers with Windows 11. Purchasing new Flex client computers should fall within the hardware requirements found on the Motorola Learning eXperience Portal (LXP) Web page here:
